EPICUS-TS

Automatically check people body temperatures within 1/3 second as they walk within 5-6 feet.

Lower staffing costs

Create a more comfortable, safer environment for staff, customers, students and visitors.

Eliminate awkward moments such as:

- pointing a manual thermometer at foreheads,
- asking people to wear masks or
- waiting in line for a temperature check.

Plug and play: standalone unmanned system with simple USB setting changes right on the device, OR

Manage your kiosks real time over Wi-Fi with Artificial Intelligence Smart Pass Software.

Like your smartphone, the Epicus tablet kiosk software uses artificial intelligence (AI) with a powerful NPU (neural processor unit) and front facing wide binocular camera to process each face in 300ms to create or update an unique record for each person, with or without a face mask.

Safe - No Contact
Accurate +/-0.6°F
Fast - 300ms per person
Range - Up To 5ft
Whole Face Thermal Imaging
Walking Pace - no need to stop

DISCLAIMER

Statements regarding this temperature device have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition. Abnormal temperature detection is merely an indicator that a person needs further medical screening.
